

MAI HUYNH

Instructional Designer | Learning Experience Design | E-Learning & Multimedia Development | M.Ed

Toronto, ON • +1 (250) 580-1898 • nguyeenmai1908@gmail.com • [LinkedIn Profile](#) • maihuyhn.fly.dev

PROFILE

Instructional designer with a Master of Education in Curriculum Studies (University of Victoria) and hands-on experience designing multimedia and e-learning content across corporate, higher-education, and K-12 contexts. Skilled in storyboarding, needs analysis, and translating subject-matter expertise into accessible, learner-centered digital courses and interactive tools — demonstrated through building a card-based learning game and 12+ e-learning modules from scratch. Proficient in Articulate Storyline 360, Camtasia, and HTML/CSS/JavaScript, with an accessible-design mindset grounded in UDL principles and working familiarity with AODA compliance.

CORE COMPETENCIES

- Instructional Design & E-Learning Development: needs analysis, storyboarding, integrating text, visuals, and interactive elements, digital learning object design
- Technical Content Translation: partnering with subject-matter experts to ensure instructional integrity of learning objects and course materials
- Content Authoring & Coding: Articulate Storyline 360, Articulate Rise 360, Camtasia, HTML/CSS, JavaScript basics, building and publishing custom-coded digital courses
- AI-Assisted Development: hands-on experience with Claude Code and AI-assisted “vibe coding” workflows to rapidly build and iterate on custom-coded courses and interactive tools, alongside responsible use of AI for content development
- LMS Integration: platform experience with TalentLMS and ManageBac, integrating content into learning platforms, quick to learn new LMS environments (e.g., Docebo)
- Accessibility & Compliance: UDL-grounded design practices, working familiarity with AODA standards and inclusive content development
- Project & Timeline Management: managing multiple concurrent course-design projects, tracking progress against deadlines independently

LEARNING & DEVELOPMENT DESIGN EXPERIENCE

Research Assistant (Instructional Designer) | University of Victoria — BC, Canada

Sep 2025 – Present

- Partner weekly with faculty in the Faculty of Education to scope, plan, and design learner-centric solutions for a postsecondary teacher-training program reaching ~200 learners annually, ensuring instructional integrity of each learning object.
- Led the creation of a 42-card gamified learning experience (“Seven Families of Climate Change Impacts”) entirely from scratch — storyboarded, designed, and coded a multi-modal digital media asset beyond standard e-learning, built from independent research into primary technical and government sources.
- Designed and built 12 e-learning modules for a climate change education course, integrating text, visuals, and interactive elements to translate dense content into accessible, digestible learning material; coded, tested, and published each module independently via GitHub Pages.
- Applied an iterative evaluation and testing process — playtesting and reviewing content with the SME to refine instructional effectiveness — keeping outcomes measurable and impactful.

Instructional Designer & Teacher | Mở Sách Co., Ltd. — Vietnam

Apr 2021 – Present

Part-time

- Teach 60+ online Creative Writing and Persuasive Writing courses (8–10 weeks each) for students in grades 4–12 over 5 years, grounded in student-centered, experiential pedagogy that prioritizes learners' voice and lived experience over rote knowledge transfer; developed curriculum with subject-matter experts and built lessons using EdTech tools including Blooket, Kahoot, Canva for Education, and various LMS platforms to manage classes.
- Built the Creative Writing and Persuasive Writing courses as custom-coded digital courses using Claude Code and vibe-coding workflows, structuring content into modular, self-paced units similar to an Articulate Rise 360 course layout — without relying on a templated authoring tool.
- Designed and developed a Sino-Vietnamese heritage language curriculum for learners aged 9–12, also built with Claude Code and vibe-coding workflows, integrating folk narrative, classical poetry, and AI-powered personalized feedback across a self-paced web-based platform structured similarly to Rise 360.
- Developed instructional sequences using a narrative-anchored vocabulary model — embedding word acquisition within story and emotional context rather than isolated word lists.

- Integrated AI-generated feedback (Claude API) to deliver personalized, Vietnamese-language responses to open-ended learner writing, adapting explanations to individual progress and background.

Learning Designer & Editor (Volunteer) | Rumie Initiative — Remote, Canada

Sep 2025 – Sep 2026

- Design and publish scenario-based microlearning courses on workplace inclusivity and cross-cultural adaptation, championing accessibility and inclusion throughout.
- Promoted to Editor: evaluate peer-authored courses for clarity, pacing, and learner engagement, providing structured feedback across a portfolio of concurrent projects.
- Validated instructional effectiveness through pilot testing with ~200 users, applying data-driven iteration to refine content and outcomes.

Course Developer / Learning Coordinator (Volunteer) | Rainbow VI — BC, Canada

Apr 2025 – Sep 2026

- Designed and published youth-facing mini-courses using scenario-based hooks and chunked, behavior-focused steps, partnering with subject-matter experts to shape and validate content.
- Facilitated a 5-week Youth Learning Design Bootcamp, acting as a change agent by teaching teens the fundamentals of instructional design and guiding them to build their own learning solutions.

Instructional Design Capstone Project | Master of Education, University of Victoria

Sep 2025 – Apr 2026

- Designed “Being Vietnamese, My Way,” a three-module Articulate Storyline 360 course grounded in Culturally Sustaining Pedagogy, applying accessibility and inclusion principles through multiple means of representation, self-directed pacing, and reflective assessment in place of traditional testing.

NovaBridge: Manager Performance Conversation Training | Independent Portfolio Project

2026

- Conducted a full needs analysis to diagnose why new managers avoid performance conversations — identifying a behavioral gap, not a knowledge gap — and designed a 5-stage emotional learning arc grounded in Kolb’s experiential learning cycle and Gagne’s events of instruction.
- Built a fully responsive web-based simulation in vanilla HTML/CSS/JS with Claude API integration, featuring three composite manager personas, a branching scenario with three decision paths, AI-generated personalized coaching feedback, and a downloadable commitment card.

PRIOR TEACHING & CURRICULUM EXPERIENCE (VIETNAM, 2017–PRESENT)

A decade of teaching and curriculum work spanning private tutoring, IB curriculum design, and gifted-class instruction, including two years as homeroom teacher and department head.

Language & Literature Teacher, IB MYP | Tesla Education Group

2023 – 2024

- Applied project-based instruction using ManageBac, Google Classroom, Nearpod, Kahoot, and Quizizz across a bilingual grades 6–8 curriculum.

Literature Teacher | Experimental High School, HCMC University of Education

2022 – 2023

- Taught a 27-student gifted Literature class and coached a team to a 100% award rate at a regional competition.

Private Tutor | Self-Employed

2017 – Present

- Planned and delivered individualized English, math, chemistry, and literature instruction to students ages 6–18, preparing tailored materials and assessing progress across one-on-one and small-group sessions.

EDUCATION

Master of Education, Curriculum Studies | University of Victoria

2024 – 2026

- Best Master's Thesis of the Cohort

Bachelor of Education, Literature Teaching | Ho Chi Minh City University of Education

2018 – 2022

- Top 4% of graduating class · Ranked 8/232
